Engineering a Smarter Future Together

# Overview

**Modis Management Consulting (MMC) is the management consulting division of Modis, a global IT consulting company. We work at the intersect of strategy, business performance, risk and change to drive innovation and digital transformation solutions that enable a more sustainable tomorrow.**

**MMC brings clarity and alignment to help obtain the business results you want.**

**Results characterised by a clear strategy and high performance.**

**Results that enable you to become a 'lighthouse' organisation.**

**Smart thinking to unlock insight and enable decision making, creating clarity, capability, and the confidence to act.**

## Our offering revolves around:

### Strategy, Governance and Decision making

Business-critical decision making requires judgement in the face of uncertainty, conflicting information, competing priorities, and overwhelming complexity.

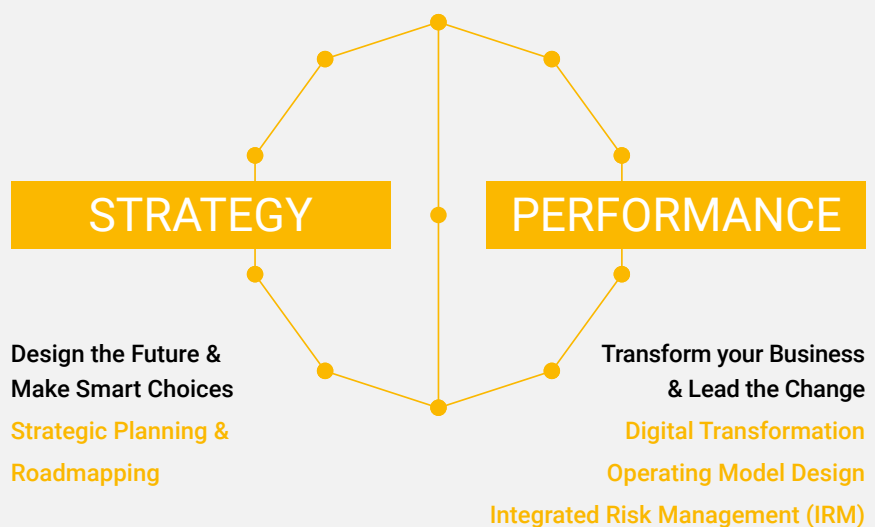

Drawing on deep smarts in strategy and leadership, decision making, risk management, stakeholder engagement and high-performance teams, we ensure your team is on the same page, inspired by a common purpose, with a clear map to the future and ready to execute with confidence.

### Business Performance and Digital Transformation

Whether you're looking to design and drive a large-scale business or digital transformation, lead a major program of work, shift to more agile ways of operating, or just need assistance with running key technology related projects and plotting an effective pathway through change, we bring expertise and evidenced based frameworks and capability to get you there.

We help you transform for sustainability and innovate to shape your future. Our team can support you to lead effectively, engage your people, customers, and stakeholders. We work with you to make sense of complexity, ensuring you have the right structures, talent, systems, and governance in place to transform your business for the fast- paced and ever evolving digital world.

## Our Management Consulting Offering

Clarity & New Ideas amid Complexity & Disruption

Ideation & Innovation

Decision Conferencing

Change

# Modis Management Consulting offers 7 core services, each of which we tailor according to our clients' specific needs.

## Strategic Planning & Roadmapping

We work collaboratively with our clients to solve business problems utilising our empathy-led strategy method. We understand that supporting our clients to rapidly innovate in this fast-paced world is critical to business performance and adaptability to market disruptions.

Our strategy development combines data driven market and customer research, our understanding of technology and data, and our real-world experience with an empathetic understanding of the goals, ambition and challenges inherent in your organisation.

Our design thinking techniques ensure we develop strategies to solve the right business problems.

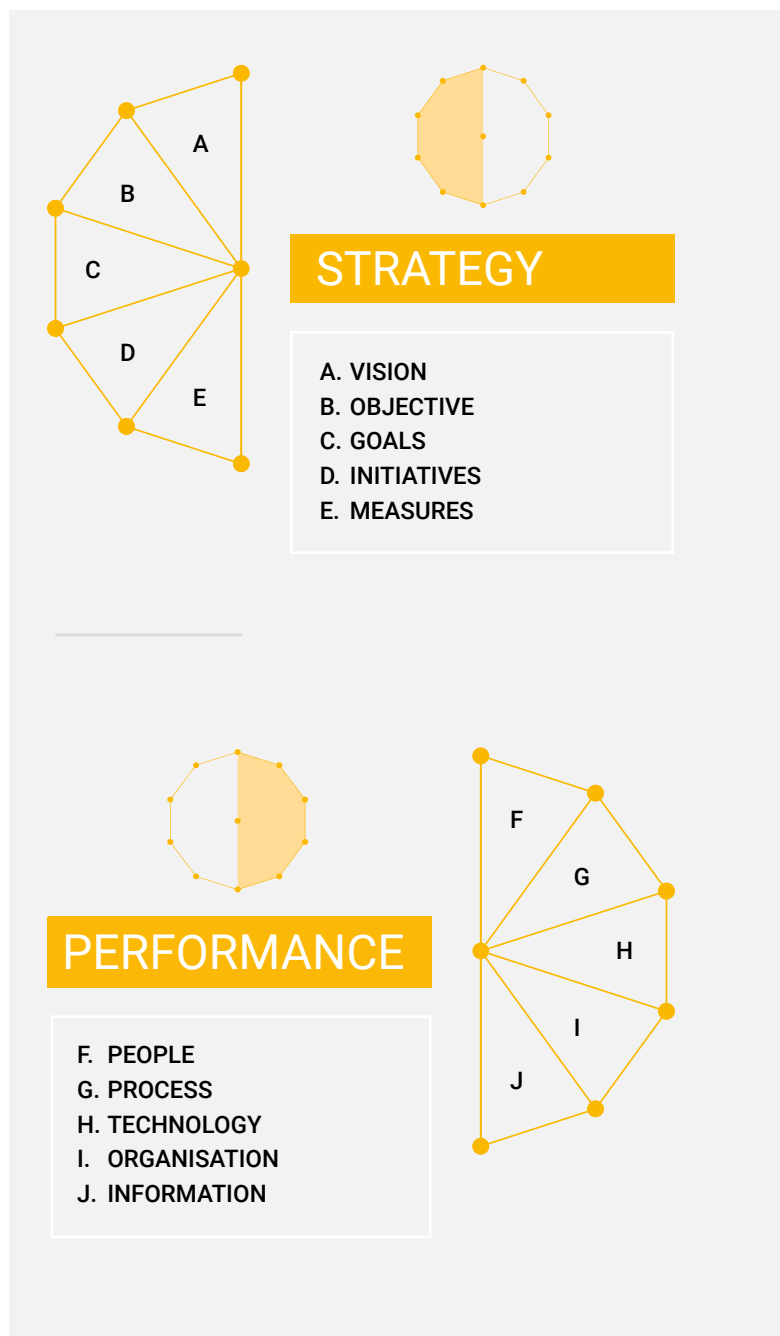

This unique approach – blending our strategic and technology acumen – enables MMC to innovate and co-design with you the most appropriate strategy and culture to meet your organisational objectives.

## Operating Model Design

Our perspective on operating models is informed by our extensive industry experience and track record of collaborating with our clients to address the challenges disrupting their industry and accelerate towards their strategic goals.

Operating Models translate organisations' strategic intent into operational capabilities, determining how the business delivers the value outlined by business strategy. However, traditional, static operating models become redundant as soon as they are implemented due to the pace of change in modern businesses.

We bring value with our Modis Management Consulting 'Smart' Operating Model designs, which are characterised by self-adjusting teams that embody an agile, customer-centred mindset. Our operating models focus on continuous innovation using agile frameworks, organisation design, processes, data, and technologies to enable the business to continue to adapt to achieve its strategic ambitions.

## Integrated Risk Management

Risk is a part of every enterprise's daily operation. Risk comes in different forms and can cause varying degrees of disruption and damage - or alternatively, return varying rates of business value.

With the ultimate goal of improving decision-making and performance - both to protect and optimise business assets and goals - Modis Management Consulting helps organisations achieve an integrated perspective on their unique risk profile.

Our structured approach and Integrated Risk Management Model (IRMM®) assists client organisations in the management of governance, risk, and compliance requirements by leveraging a holistic, enterprise-level risk management approach as opposed to a 'siloed' or reactive approach. We integrate the intertwined strategic, operational, and digital domains of risk management, approaching them as a continuum that extends across the enterprise.

## Digital Transformation

Our approach combines our strategy acumen and digital expertise to co-create digital transformations and support their successful delivery.

We use Modis Management Consulting's 'Lighthouse'® Digital Transformation Framework as a blueprint that guides our clients to successfully achieve their strategic goals when undertaking a digital transformation. It outlines the overlapping considerations in reimagining the business, understanding that no facet of the organisation is untouched by a digital transformation and acknowledging that the selection of technology and the cultural changes required are equally important.

Our technology strength and operating model expertise - coupled with our empathetic change leadership style - empowers our clients to accelerate their digital transformation and positions them to keep transforming long after a Modis Management Consulting engagement ends.

## Change

The pace of change and complexity of modern initiatives makes it challenging to put the best-laid strategies and plans into effect. A lack of clarity and constantly changing agendas can lead to non-acceptance of new initiatives, with teams or individuals focussing on their own interests.

Using best of breed models and strategic thinking, Modis Management Consulting works closely with our senior clients so they can help their people shift the way they think, behave and act. Our partnership approach helps organisations lead and embrace change, setting them up for success as resilient, self-managing organisations capable of successfully embracing change into the future.

## Ideation & Innovation

In the world of business, there are many different types of innovation that an organisation might pursue. These embrace but can extend beyond technology – into process and business model change. At Modis Management Consulting, we see technology as an enabler of innovation, identified once the problem has been accurately framed and solution options ideated.

The ideas and innovations we seek are not just radical technological breakthroughs that transform business service delivery; they are disruptive business model shifts that change markets and create new customer value propositions.

Critically, we spend time ‘walking in our client’s shoes’ to collaboratively get to the heart of the issue and identify their real needs. Via a series of structured workshops, we utilise design thinking methods to deliver ideation and innovation, leaning on Modis’s extensive and wide-ranging technology expertise to bring ideas to life in rapid prototypes.

## Decision Conferencing

Our Decision Conferences are designed for a group of decision-makers who have a choice to make between competing options or who are stuck on a ‘go / no go’ decision. Typical applications include Strategy Development; Investment Decisions; Organisational Design and Prioritisation or Resource Allocation decisions – in fact any situation where you need to choose between options or allocate scarce resources and you need agreement and a roadmap on the way forward.

Using innovative digital tools, these sessions deliver clear, smart thinking and identify ‘best bet’ outcomes amidst uncertainty, resulting in a clear path forward. The entire process is designed to enhance engagement, increase diversity of thinking and reduce decision bias – with the end result being enhanced Decision Quality. Participants develop a deeper shared understanding, focus on what really matters, and reach consensus on the final agreed outcome or recommendations – and thus commit to action. We make explicit the assumptions and biases that underpin choices made via less robust approaches. This in turn enhances the objectivity of the outcome and ensures a clear audit trail of the final recommendation(s) - a strong governance value add.

A photograph of three people sitting around a wooden table in a modern office setting. A man with curly hair and a beard is on the left, smiling and holding a green pen. A woman with long dark hair is in the center, seen from the back. A man with glasses and a red shirt is on the right, also smiling. They appear to be in a collaborative meeting. The background shows large windows and office furniture.

## About Modis, soon to become Akkodis.

Modis & AKKA, soon to become Akkodis, is a global leader in the engineering and R&D market that is leveraging the power of connected data to accelerate innovation and digital transformation. With a shared passion for technology and talent, 50,000 engineers and digital experts deliver deep cross-sector expertise in 30 countries across North America, EMEA and APAC.

Akkodis offers broad industry experience, and strong know-how in key technology sectors such as mobility, software & technology services, robotics, testing, simulations, data security, AI & data analytics. The combined IT and engineering expertise brings a unique end-to-end solution offering, with four service lines – Consulting, Solutions, Talents, and Academy – to support clients in rethinking their product development and business processes, improve productivity, minimize time to market and shape a smarter and more sustainable tomorrow. Akkodis is part of the Adecco Group.
